

MCQ Questions in Java Script

```
1.<script  
type="text/javascript">  
x=4+"4";  
document.write(x);  
</script>
```

What is the output?

(a) 44

(b) 8

(c) 4

(d) Error output

Correct answer (a)

```
2.<script  
type="text/javascript"  
language="javascript">  
var qpt = "Qualiyt Point  
Technologies";  
var result = qpt.split(" ");  
document.write(result);  
</script>
```

(a) Quality

(b) Q,u,a,l,i,t,y,P,o,i,n,t,T,e,c,h,
n,o,l,o,g,i,e,s

**(c) Qualiyt,Point,Technologi
es**

(d) QualityPointTechnologi
es

Correct answer (c)

3.Is it possible to nest functions
in JavaScript?

(a) True

(b) False

```
4.<script>  
document.write(navigator.app  
CodeName);  
</script>
```

What is the output?

**(a) Get code name of the
browser of a visitor**

(b) set code name of the
browser of a visitor

(c) None of the above

(d)

Correct answer (a)

5.Which of the following is
true?

**(a) If on Key Down returns
false, the key-press event is
cancelled.**

**(b) If onKeyPress returns
false, the key-down event is
cancelled.**

(c) If onKeyDown returns
false, the key-up event is
cancelled.

(d) If onKeyPress returns
false, the key-up event is
canceled.

Correct answer (a)

6.Scripting language are?

**(a) High Level
Programming language**

(b) Assembly Level
programming language

(c) Machine level
programming language

(d) None of the above

Correct answer (a)

7.Which best explains
getSelection()?

(a) Returns the VALUE of a
selected OPTION.

(b) Returns document URL
of the window in focus.

**(c) Returns the value of
cursor-selected text**

(d) Returns the VALUE of a
checked radio input.

Correct answer (c)

```
8.<script language="javascript">
function x()
{
var s= "Good 100%";
var pattern = /\D/g;
var output= s.match(pattern);
document.write(output);
}
</script>
```

What is the output?

(a) Good %

(b) 1,0,0

(c) G,o,o,d,%

(d) Error

Correct answer (c)

```
9.<script
language="javascript">
var qpt="QUALITY POINT
TECHNOLOGIES";
alert(qpt.charAt(qpt.length-
1));
</script>
```

What is the output?

(a) P

(b) E

(c) S

(d) Error

Correct answer (c)

10.Choose the client-side
JavaScript object:

(a) Database

(b) Cursor

(c) Client

(d) FileUpload

Correct answer (d)

11.Are java and javascript the
same?

(a) No

(b) Yes

Correct answer (a)

12.Syntax for creating a
RegExp object:

(a). var txt=new
RegExp(pattern,attributes);

(b). var
txt=/pattern/attributes;

(a) (a) only

(b) (b) only

(c) Both (a) and (b)

(d) None of the above

Correct answer (c)

```
13.<script
language="javascript">
function x(z,t)
{
alert(x.length);
}
</script>
```

What is the output?

(a) Error

(b) 2

(c) 1

(d) 3

Correct answer (b)

14.What is mean by "this" keyword in javascript?

(a) It refers current object

(b) It refers previous object

(c) It is variable which contains value

(d) None of the above

Correct answer (a)

15.In JavaScript, Window.prompt() method return true or false value ?

(a) False

(b) True

(c) None of the above

Correct answer (a)

16.Math. round(-20.51)=?

(a) 20

(b) -20

(c) 19

(d) None

Correct answer (b)

```
17.<script
language="javascript">
function x()
{
var s = "Quality 100%!{[!!";
var pattern = /\w/g;
var output = s.match(pattern);
document.write(output);
}
</script>
```

What is the output?

(a) %,!,{,[,!,!

(b) Q,u,a,l,i,t,y,1,0,0

(c) Quality 100

(d) Error

Correct answer (b)

```
18.<script
type="text/javascript"
language="javascript">
var qpt= new Array();
qpt[0] = "WebDevelopment";
qpt[1]="ApplicationDevelopm
ent"
qpt[2]="Testing"
qpt[3] =
"QualityPointTechnologies";
document.write(qpt[0,1,2,3]);
</script>
```

What is the output?

(a) Error

(b) QualityPointTechnologies

(c) WebDevelopment

(d) WebDevelopmentnet,ApplicationDevelopment,Testing,QualityPointTechnologies

Correct answer (b)

19. Choose the server-side JavaScript object:

- (a) FileUpload
- (b) Function
- (c) File
- (d) Date

Correct answer (c)

20. `parseFloat(9+10)=?`

- (a) 19
- (b) 910
- (c) None
- (d) Error

Correct answer (a)

```
21.<script
language="javascript">
function x()
{
document.write(2+5+"8");
}
</script>
```

- (a) 258
- (b) Error
- (c) 7
- (d) 78

Correct answer (d)

22. _____ keyword is used to declare variables in javascript.

- (a) Var
- (b) Dim
- (c) String

(d) None of the above

Correct answer (a)

23. In Javascript, Which of the following method is used to evaluate the regular expression?

- (a) `eval(2*(3+5))`
- (b) `evaluate(2*(3+5))`
- (c) `evalu(2*(3+5))`
- (d) None of the above

Correct answer (a)

```
24.<script
language="javascript">
function x()
{
var s= "quality 100%";
var pattern = /\d/g;
var output= s.match(pattern);
document.write(output);
}
</script>
```

- (a) 100
- (b) 1,0,0
- (c) q,u,a,l,i,t,y,%
- (d) Error

Correct answer (b)

25.<script type="text/javascript"
language="javascript">

qpt=((45%2)==0)? "hello" : "bye";
document.write(qpt);

</script>

What is the output?

- (a) hello
- (b) bye
- (c) Error in string handling
- (d) None of the above

Correct answer (b)

26.<script language="javascript">
function x()
{
var qpt = "QualityPointTechnologies";
var pattern = new RegExp("POliNT","i");
document.write(qpt.match(pattern));
}
</script>

What is the output?

- (a) Error
- (b) POliNT
- (c) Point
- (d) Null

Correct answer (d)

27.How do you create a new object in
JavaScript?

- (a) var obj = {};
- (b) var obj = Object();

- (c) var obj=new {};
 - (d) None of the above
- Correct answer (a)

28.In Javascript, What does is
NaN function do?

- (a) Return true if the
argument is not a number.
 - (b) Return false if the
argument is not a number.
 - (c) Return true if the
argument is a number.
 - (d) None oh the above
- Correct answer (a)

29.If x=103 & y=9 then x%=y ,
what is the value of x after
executing x%=y?

- (a) 4
- (b) 3
- (c) 2
- (d) 5

Correct answer (a)

30.Choose the external object:

- (a) Date
- (b) Option
- (c) Layer
- (d) Check box

Correct answer (d)

31. Choose the four symbol pairs that represent RegExp properties lastMatch, lastParent, leftContext, and rightContext, respectively:

(a) \$&, \$+, \$`, \$'

(b) \$+, \$&, \$', \$`

(c) \$&, \$~, \$`, \$'

(d) \$+, \$&, \$`, \$'

Correct answer (a)

32. parseInt("15",10)=?

(a) 15

(b) 10

(c) 151

(d) 150

Correct answer (a)

33. Which JavaScript feature uses JAR files?

(a) Object signing

(b) Style sheets

(c) Netcaster channels

(d) Image rollovers

Correct answer (a)

34. How to assign a function to a variable with the JavaScript Function constructor ?

(a) var

f=Function("x","y","return x+y");

(b) var f=Function(x,y){
return x+y;}

(c) var f= new Function("x",
"y", "return x + y");

(d) None of the above

Correct answer (c)

35. In JavaScript, Window.alert() is used to allow user to enter something

(a) True

(b) False

(c) None of above

(d)

Correct answer (b)

```
36.<script  
language="javascript">  
function x()  
{  
var qpt = "We are fast growing  
Software Company located in  
Chennai, India.";  
var pattern = new  
RegExp("in","gi");
```

```
document.write(pattern.exec(  
qpt) + " ");  
document.write(pattern.exec(  
qpt) + " ");  
document.write(pattern.exec(  
qpt) + " ");  
}
```

```
</script>
```

(a) in in In

(b) in in in

(c) in in null

(d) in null null

Correct answer (a)

37. Is Javascript has any date data type?

(a) Yes

(b) No

(c) None of the above

Correct answer (b)

38. Math. round(-20.5)=?

(a) -21

(b) 20

(c) -20

(d) 21

Correct answer (c)

39. ?_name is it valid javascript identifier?

(a) Yes

(b) No

(c) None of the above

(d)

Correct answer (b)

```
40.<script
language="javascript">
function x()
{
var qpt = "First come, first
served";
var pattern = /first/gi;
document.write(qpt.match(pa
ttern)[1]);
}
</script>
```

What is the out put?

(a) first

(b) undefined

(c) First

(d) Error

Correct answer (a)

41.(a). // , /* **/

(b). / , /**/ , /*

(c). /**/ , //

(d). **\ , //

In javascript, Which of the above Comments lines are used ?

(a) Only (d)

(b) Only (c)

(c) Either (c) or (d)

(d) Only (b)

Correct answer (b)

```
42.<script
language="javascript">
function x()
{
var s = "Give 100%!{[!!";
var pattern = /\W/g;
var output = s.match(pattern);
document.write(output);
}
</script>
```

(a) ,%,!,{,[,!,!

(b) G,i,v,e,1,0,0

(c) Give 100

(d) Error

Correct answer (a)

43. Which best describes void?

- (a) A method
- (b) A function
- (c) A statement
- (d) An operator

Correct answer (d)

```
44.<script
type="text/javascript"
language="javascript">
var
qpt="QualityPointTechnologies";
var result
=qpt.lastIndexOf("l");
document.write(result);
</script>
```

What is the output?

- (a) 3
- (b) 18
- (c) 17
- (d) 19

Correct answer (b)

```
45.) <script
language="javascript">
function x()
{
var qpt = "First come, first
served";
var pattern = /first/g;
document.write(qpt.match(pattern)[1]);
}
</script>
```

What is the output

- (a) first

(b) First

(c) undefined

(d) None of the above

Correct answer (c)

```
46.<script
language="javascript">
function sum(x)
{
function add(y)
{
return x+y;
}
return add;
}
function callme() {
result=sum(5)(5);
alert(result); }
</script>
```

If you call the function callme(), what will happen ?

(a) 10

(b) Error in calling Function

(c) 5

(d) None of the above

Correct answer (a)

47.) Who invented the javascript programming language?

(a) Dennis Ritchie

(b) James Gosling

(c) Brendan Eich

(d) None of the above

Correct answer (c)

```
48.<script
type="text/javascript">
document.write("<h1>This is
a heading</h1>");
document.write("<p>This is a
paragraph.</p>");
document.write("<p>This is
another paragraph.</p>");
</script>
```

Can you write HTML tag inside the javascript ?

- (a) No
 - (b) Yes**
 - (c) Impossible
 - (d) None of the above
- Correct answer (b)

49.Which feature is supported in MSIE 3.x?

- (a) split()
 - (b) document.clear()
 - (c) join()
 - (d) charAt()**
- Correct answer (d)

50.How to specify the color of the hypertext links with JavaScript ?

- (a) document.linkColor="#00FF00";**
 - (b) document.LColor="#00FF00";
 - (c) document.LinkC="#00FF00";
 - (d) document.hyperTextLink="#00FF00";
- Correct answer (a)

```
51.script language="javascript">
function x()
{
var qpt = "QualityPointTechnologies";
var pattern = /point/;
```

```
var output= qpt.search(pattern);
```

```
document.write("Position: " + output);
}
</script>
```

What is the output?

- (a) Position-7
 - (b) Position-1
 - (c) Null
 - (d) Error
- Correct answer (b)

52.----- method returns the number of milliseconds in a date string?

- (a) setHours()
 - (b) setMinutes()
 - (c) parse()
 - (d) None of the above
- Correct answer (c)

53.----- converts a string to floating point numbers.

- (a) eval
 - (b) parseInt
 - (c) parseFloat
 - (d) None
- Correct answer (c)

54.----- attempts to evaluate a string representing any javascript literals or variables, converting it to a number.

- (a) eval

(b) parseFloat

(c) parseInt

(d) None

Correct answer (a)

55.Which is not an attribute of the cookie property?

(a) path

(b) host

(c) secure

(d) domain

Correct answer (b)

56.How do substring() and substr() differ?

(a) One is not a method of the String object.

(b) substr() takes three arguments, substring() only two.

(c) Only one accepts a desired string length as an argument.

(d) Besides the spelling, nothing.

Correct answer (c)

57.Which is not a reserved word?

(a) interface

(b) short

(c) program

(d) throws

Correct answer (c)

58.In Javascript, Which of the following method is used to find out the character at a position in a string?

(a) charAt()

(b) CharacterAt()

(c) CharPos()

(d) characAt()

Correct answer (a)

```
59.<script
type="text/javascript"
language="javascript">
```

```
var qpt =
"QualityPointTechnologies";
var result =qpt.substring(7,8);
document.write(result);
```

```
</script>
```

What is the output

(a) Po

(b) yP

(c) oi

(d) P

Correct answer (d)

60.How do you delete an element from an options array?

(a) Set it to false.

(b) Set it to null.

(c) Set it to undefined.

(d) Set it to -1

Correct answer (b)

61.Is javaScript case sensitive ?

- (a) Yes
- (b) No
- (c) None of the above
- (d)

Correct answer (a)

62. JavaScript RegExp Object has modifier 'i' to _____ ?

- (a) Perform case-sensitive matching
- (b) Perform case-insensitive matching
- (c) Perform both case-sensitive & case-insensitive matching
- (d) None of the above

Correct answer (b)

63. What are the following looping structures available in javascripts?

a) for, foreach

- (a) for, foreach
- (b) foreach, while loop
- (c) do-while loop, foreach
- (d) for, while loop

Correct answer (d)

64. Which of these is not a method of the Math object?

- (a) atan()
- (b) atan2()
- (c) eval()
- (d) acos()

Correct answer (c)

```
65.<script
type="text/javascript">
var s = "9123456 or 80000?";
var pattern = /\d{4}/;
var output = s.match(pattern);
document.write(output);
</script>
```

What is the output?

- (a) 9123
- (b) 91234
- (c) 80000
- (d) None of the above

Correct answer (a)

66. In javascript, RegExp Object Method test() is used to search a string and returns _____?

- (a) true or false
- (b) found value
- (c) index
- (d) None of the above

Correct answer (a)

67. What property would you use to redirect a visitor to another page?

- (a) document.URL
- (b) window.location.href
- (c) document.location.href
- (d) link.href

Correct answer (b)

68. a.) var qpt="Quality Point Technologies";

b.) var qpt=new String("Quality Point Technologies");

Question:

In javascript, which of the above statement can used for string declaration ?

- (a)) Either (a) or (b)
- (b) Only (a)
- (c) Neither (a) nor (b)
- (d) Only (b)

Correct answer (a)

```
69.<script
type="text/javascript"
language="javascript">
var qpt =
"QualityPointTechnologies";
var result
=qpt.indexOf("Tech");
document.write(result);
</script>
```

What is the output?

- (a) 11
- (b) 12
- (c) 15
- (d) 13

Correct answer (b)

```
70.script
language="javascript">
function x()
{
var s = "Eat to live, but do not
live to eat";
var pattern = new
RegExp("eat$");
document.write(pattern.exec(
s));
}
</script>
```

What is the output?

- (a) Eat
- (b) eat
- (c) undefined
- (d) Eat eat

Correct answer (b)

```
71.<script
language="javascript">
function x()
{
var qpt = "We are fast growing
Software Company located in
Chennai, India.";
var pattern = new
RegExp("in","g");

document.write(pattern.exec(
qpt) + " ");
document.write(pattern.exec(
qpt) + " ");
document.write(pattern.exec(
qpt) + " ");
}
```

</script>

What is the output?

- (a) in in In
- (b) in in in
- (c) in in null
- (d) in null null

Correct answer (c)

72.----- method is used to remove focus from the specified object.

- (a) blur()
- (b) focus()
- (c) None
- (d)

Correct answer (a)

73.parseFloat("FF2")=?

- (a) 152
- (b) FF2
- (c) NaN
- (d) None

Correct answer (c)

74.eval((20*4)=?

- (a) Nan
- (b) 204
- (c) 24
- (d) 80

Correct answer (d)

```
75.)<script
language="javascript">
function x()
{
var qpt =
"QualityPointTechnologies";
var pattern = new
RegExp("TECHNOLOGIES","i")
;
document.write(qpt.match(pa
ttern));
}
</script>
```

What is the output?

- (a) null
- (b) Technologies
- (c) TECHNOLOGIES
- (d) Error

Correct answer (b)

76.How do you create a function?

- (a) function myFunction()
- (b) function:myFunction()
- (c) function=myFunction()
- (d) None of the above

Correct answer (a)

77.How do you call a function named "myFunction"?

- (a) call function myFunction
- (b) call myFunction()
- (c) myFunction()
- (d) None of the above

Correct answer (c)

78.How do you write a conditional statement for executing some code if "i" is equal to 5?

- (a) if i=5 then
- (b) if (i==5)
- (c) i==5 then
- (d) i=5

Correct answer (b)

79.How do you write a conditional statement for executing some code if "i" is NOT equal to 5?

- (a) if (i <> 5)
- (b) if != 5 then
- (c) if (i != 5)
- (d) if <>5

Correct answer (c)

80.How does a "while" loop start?

- (a) while i=1 to 10
 - (b) while (i<=10)
 - (c) while (i;<=10;i++)
 - (d) None of the above
- Correct answer (b)

81.How does a "for" loop start?

- (a) for (i = 0; i <= 5; i++)
 - (b) for i = 1 to 5
 - (c) for (i = 0; i <= 5)
 - (d) for (i <= 5; i++)
- Correct answer (a)

82.How can you add a comment in a JavaScript?

- (a) 'This is a comment
 - (b) //This is a comment
 - (c)
 - (d) None of the above
- Correct answer (c)

83.What is the correct JavaScript syntax to insert a comment that has more than one line?

- (a) /*This comment has more than one line*/
 - (b)
 - (c) /This comment has more than one line//
 - (d) None of the above
- Correct answer (a)

84.What is the correct way to write a JavaScript array?

- (a) var txt = new Array("tim","kim","jim")

- (b) var txt = new Array(1:"tim",2:"kim",3:"jim")
 - (c) var txt = new Array:1=("tim")2=("kim")3=("jim")
 - (d) var txt = new Array="tim","kim","jim"
- Correct answer (a)

85.How do you round the number 7.25, to the nearest integer?

- (a) round(7.25)
 - (b) math.rnd(7.25)
 - (c) rnd(7.25)
 - (d) math.round(7.25)
- Correct answer (d)

86.How do you find the number with the highest value of x and y?

- (a) ceil(x,y)
 - (b) math.max(x,y)
 - (c) top(x,y)
 - (d) math.ceil(x,y)
- Correct answer (b)

87.Output of the following code :

```
<script>
var temp=1, a=2,c;
do{
c=ab;
a=b;
}
while(c<20);
document.write(c);
</script>
```

- (a) 20
- (b) 21
- (c) 13

(d) None of the above

Correct answer (c)

(a) 4

(b) 5

(c) 6

(d) 7

Correct answer (d)

88. Which of the following are important characteristics of an array?

(a) Each element has same data type.

(b) The entire array is stored contiguously in memory

(c) Every array has to be declared before it is used

(d) None of the above

Correct answer (a)

92. Which of the methods declares an array of infinite length and allows you to add elements at run time?

(a) `array name=new array (array length)`

(b) `array name=new array ()`

(c) `array name=new array (5)`

(d) None of the above

Correct answer (c)

89. When an array is initialized during the declaration stage, known as ----- array.

(a) Single dimension

(b) Multi dimension

(c) Dense

(d) None of the above

Correct answer (c)

93. `my array =new array (1,4,3,6,10,0,22)`
`document.write(my array.sort())`

What will be the output?

(a) 22,10,6,4,3,1,0

(b) 1,4,3,6,10,0,22

(c) 6,10,22,4,3,2,1

(d) 0,1,3,4,6,10,22

Correct answer (d)

90. We can create an array containing -----?

(a) String

(b) Boolean values

(c) Other array

(d) Null

Correct answer (a)

94. Which of the following standard functions convert an array to a string?

(a) `toString`

(b) `join()`

(c) `sort()`

(d) `revers()`

Correct answer (a)

91. `My array=new array(1,"s2","s5",true,new array(1,2,3))`

95.my
array=array("Aptech","Computer","Education")
document.write(my
array[1]);

what will be the output?

- (a) Aptech
- (b) Computer
- (c) Education
- (d) Null

Correct answer (b)

96.Choose which are reserved words?

- (a) typeof, void
- (b) abstract, with
- (c) debugger
- (d) all of the above

Correct answer (d)

97.<script>
var temp=10;
document.write(temp++);
document.write(++temp);
</script>

What is the output?

- (a) 1012
- (b) 1011
- (c) 1112
- (d) None of the above

Correct answer (a)

98.JavaScript is a object based scripting language.

- (a) true
- (b) false
- (c)
- (d)

Correct answer (a)

99.<script>
var num=20;
var num=30;
document.write(num+num);
</script>

What will be the output?

- (a) 20
- (b) 30
- (c) 50
- (d) None of the above

Correct answer (c)

100.Escape sequence always begin with a backslash and used in document.write.

- (a) true
- (b) False
- (c)
- (d)

Correct answer (b)

101.Which of the following are correct declarations of variables in JavaScript.

- (a) var i,j=0;
- (b) var 8ip;

- (c) var_rahim
 - (d) var i,j=0;
- Correct answer (a)

102.Which of the following is not a good user for javaScript?

- (a) Implement small, simple programs.
- (b) large application development.
- (c) provided limited user interaction.
- (d) Quick development of programs.

Correct answer (a)

103.-----are those whose scope to limited within the block in which they are declared and can not be accessed from out side that particular block.

- (a) Local variable
- (b) Global variable
- (c) None
- (d)

Correct answer (a)

104.Statment1:
JavaScript is loosely typed language, does not require to specify the type of the data contained in a variable while declaring.

Statement2:

In JavaScript same variable can be used to store an integer,string or float.

- (a) Only statement 1 is true
 - (b) Only statement 2 is true
 - (c) both are false
 - (d) both are true
- Correct answer (d)

105.The statement while(3==3) is an example of-----?

- (a) A typographical error
 - (b) an infinite loop
 - (c) an illegal JavaScript statement
 - (d) None of the above
- Correct answer (b)

106.Which of the following object cannot be used with the new keyword?

- (a) Date
 - (b) Math
 - (c) String
 - (d) None of the above
- Correct answer (a)

107.What does the prototype keyword allow you to do in a script?

- (a) Change the syntax or JavaScript commands
- (b) Modify the dimension of built-in objects
- (c) Modify the user's browser so only your script will work
- (d) None of the above

Correct answer (b)

108.JavaScript was originally developed by---

- (a) Netscape
- (b) Microsoft
- (c) IBM
- (d) Sun Micro System

Correct answer (c)

109.Which of the following are conditional statements?

- (a) if else statement
- (b) while statement
- (c) for statement
- (d) Break and continue statement

Correct answer (a)

110.Which of the following are looping statements?

- (a) While statement
- (b) for statement
- (c) if ... else statement
- (d) Break and continue statement

Correct answer (b)

111.In the do ... while statement the condition may be checked

- (a) at the beginning of a statement
- (b) at the end of a statement
- (c) at the middle of a statement
- (d) both a and b are true

Correct answer (a)

112.the sub string method returns the.....?

- (a) Character of a string
- (b) The numeric value of specified string
- (c) whole string
- (d) None of the above

Correct answer (a)

113.typeof operator returns which of the following values?

- (a) Boolean
- (b) Function
- (c) Undefined
- (d) null

Correct answer (a,b)

114.'===' operator is used for which purpose?

- (a) Equality of value
- (b) Equality of type
- (c) Both a and b are true
- (d) None of the above

Correct answer (b)

```

115.var i=1, j=10;
do{
if(i++>--j)
{
continue;
}
while(i<5);
}
document.write("i="+i+"and
j="+j);

```

What is the result?

- (a) i=6 and j=5
- (b) i=5 and j=5
- (c) i=6 and j=6
- (d) i=5 and j=6

Correct answer (d)

116.<script>

```

var a=2;
switch(a)
{
case:1 document.write("jan");
break;
case:2 document.write("feb");
default:
case:1 document.write("out of
range");

```

</script>

What will be the output?

- (a) jan
- (b) feb
- (c) feb, out of range
- (d) error

Correct answer (b)

117.The process of dealing errors in a script or program is known as.....?

- (a) Error detection
- (b) frustration
- (c) debugging
- (d) None of the above

Correct answer (c)

118.The code execute in response to an event is called an or?

- (a) Event handler, Message handler
- (b) Array, Function
- (c) Calling a function called function
- (d) None of the above

Correct answer (c)

119.Which of the following are advantages of function?

- (a) Code can be altered without affecting other parts of the program.
- (b) Ease of understand
- (c) Save memory space
- (d) All

Correct answer (d)

120.Function parameter are also referred as-----?

- (a) Index
- (b) Argument
- (c) String
- (d) None of the above

Correct answer (b)

121.When does the onLoad event handler execute?

- (a) When an image is finished loading
- (b) When the page and all of its images are finished.
- (c) When user attempt to load another page.
- (d) None of the above

Correct answer (a)

122.Which of the following objects can be used load a new URL into the browser window?

- (a) document.url
- (b) document.write
- (c) window.url
- (d) window.location

Correct answer (d)

123.Which of the following methods a dialog box with OK and Cancel buttons and waits for a response?

- (a) window.alert
- (b) window.confirm
- (c) window.prompt
- (d) None of the above

Correct answer (a)

124.When creating rollovers which HTML should include the onMouseOver event handler?

- (a)
- (b)
- (c)
- (d) None of the above

Correct answer (c)

125.What can javascript do with forms that CGI script can't?

- (a) Cause all sorts of problem
- (b) Submit the data to a browser

(c) Gives the user instant feedback about errors.

(d) All

Correct answer (b)

126.To go to the next page, which of the following is right syntax

- (a) window.history.froward()
- (b) window.history.back()
- (c) window.history.go(1)
- (d) window.history.go(-1)

Correct answer (c)

127.To open an additional window which is the possible syntax?

- (a) window.open
- (b) self.open
- (c) window.open()
- (d) addition.open

Correct answer (d)

128.Which of the following is executed first by a browser?

- (a) Script in the section
- (b) Script in the section
- (c) An even handler for a button
- (d) None of the above

Correct answer (c)

129.Which of the following object can not be used with the new key word?

- (a) date
- (b) math
- (c) string
- (d) None of the above

Correct answer (b)

```
130.var i=1j=10;
do{
  if(i>j)
  {
    break;
  }
  j--;
}
while(++<5);
document.write("i="+i+"and
j="+j);
```

What will be the result?

- (a) i=6 and j=5
- (b) i=5 and j=5
- (c) i=5 and j=6
- (d) i=6 and j=6

Correct answer (a)

131.What dose the <noscript> tag to do?

- (a) Enclose text to be displayed by non-javascript browser.
- (b) Prevents script on the page from executing.
- (c) Describes certain low-budget movies.
- (d) None of the above.

Correct answer (a)

132.Which feature of new browsers allows you to use javascript?

- (a) HTML 4.0
- (b) HTML 0.4
- (c) CSS2 .0
- (d) The DOM

Correct answer (a)

133.Which of the following DOM objects never has a parent node?

- (a) body
- (b) div
- (c) document
- (d) None of the above

Correct answer (c)

134.Javascript can access database?

- (a) true
- (b) false
- (c)
- (d)

Correct answer (a)

135.What dose the break statement do?

- (a) exit from form
- (b) starts the loop over
- (c) escape the loop entirely
- (d) None of the above

Correct answer (c)

136.Which is the static object?

- (a) date
- (b) string
- (c) math
- (d) None

Correct answer (b)

137.How do you put a message in the browsers status bar?

- (a) status ("put you message")

(b) window.status ("put you message here")

(c) statusbur="put you message"

(d) status ="put you message"

Correct answer (a)

138.How do you find the clients browsers name?

(a) client.navName

(b) navigator.appName

(c) browser.name

(d) None of the above

Correct answer (b)

139.After evaluating the element

```
var x="25"+250;
```

x will have the value....?

(a) "25250"

(b) 25250

(c) "275"

(d) 275

Correct answer (b)

```
140.<script language  
"javascript">
```

```
var i=5;
```

```
while(true)
```

```
{
```

```
document.write("dhaka");
```

```
break;
```

```
}
```

```
</script>
```

What is the result?

(a) Error

(b) infinitive loop

(c) print dhaka only once

(d) None of the above

Correct answer (c)

141.To load a new URL?

(a) document.url

(b) window.location

(c) window.history

(d) b and c

Correct answer (b)

142.Which of the following is correct event handler to detect mouse click

(a) onCommand

(b) onLink

(c) onMouseup

(d) onClick

Correct answer (d)

143.var x=3;

var y=1;

if(x=y)

{

document.write("x="+x);

}

What is the result?

(a) x=1

(b) x=3

(c) The code runs with not output

(d) error

Correct answer (a)

144.<script>

var i=0;

for(i;i<4;i+=2)

{

```
document.write(i+"");
}
document.write(i);
</script>
```

what will be the output?

- (a) 0 2 4
- (b) 0 2 4 5
- (c) 0 1 2 3 4
- (d) Error

Correct answer (a)

```
145.<script>
for(i=0;i<3;i++)
{
switch(i)
{
case0; break;
case1;
document.write("one");
case2;
document.write("two");
case3;
document.write("three");
}
}
```

```
document.write("done");
What is the result?
```

- ```
</script>
```
- (a) done
  - (b) one two done
  - (c) one two three done
  - (d) compilation fails
- Correct answer (c)

```
146.public void test (int x)
{
int odd=x%2;
```

```
if(odd)
{
document.write("even");
}
}
```

Which statement is true?

- (a) Error
- (b) "odd" will always be output
- (c) "even" will always be output
- (d) b and c

Correct answer (a)

```
147.var i=0;
while(true)
{
if(i==4)
{
break;
}
--i;
}
document.write("i="+i);
(a) 3
(b) 4
(c) 5
(d) error
Correct answer (c)
```

```
148.<script
language="javascript">
```

```
var a='TCL';
var b=a.toLowerCase();
b.concat('dhaka');
document.write(b);
```

```
</script>
What will be the output?
(a) tcl
(b) dhaka
```

(c) tcldhaka

(d) TCL

Correct answer (c)

149. Which is a valid identifier?

(a) false

(b) default

(c) object

(d) a class

Correct answer (c)

150. The syntax of the charAt() method is.....?

(a) charAt(string index position ending index position)

(b) charAt(string index position e)

(c) charAt( ending index position)

(d) All of the above

Correct answer (a)

151. Which of the following are not true?

(a) When a function is called from within a program, the control (flow at the program) is transferred to the function.

(b) a function can not be used another function.

(c) standard function can be used user define function.

(d) after the last statement of the function is executed, the control is transferred back to the calling program, to the statement of the function call.

Correct answer (b)

152. ----- is a popular data-encryption package

(a) mhash

(b) md5

(c) MCrypt

(d) All of the above

Correct answer (c)

1. what is the value of x if x=13?

x++=? 13

--x=? 12

++x=? 14

**Ans: x--=? 13**

2. var a=Bangladesh is a good country.

var b=\desh\gi

document.write(a.match(b)).

**Ans: desh**

3. what can we do by pop().

4. what is reference.

5. var a=open();

var st=a.document;

for output in new window what is write code?

a. open New windows.write();

b. a.write();

**c. st.write();**

d. Window.write();

6. Delete family();

7. pop()

8. IndexOf();

9. Replacing the word?

10. a=20;

b=""

do

{

b+=a;

}while(a<15)

```
document.write(b);
```

**ans: 20**

11. var a="working with javascript and work hard";

```
var b= a.replace(/work/gi/,"play");
```

```
document.write(a+
+b);
```

**ans: working with javascript and work hard**

**playing with javascript and play hard**

12. var x=12;

```
document.write(x++); 12
```

```
document.write(--x); 12
```

```
document.write(x--); 12
```

```
document.write(--x); 10
```

**Ans: 12,12,12,10**

13. var a=0;

```
do{ a++}
```

```
while (a<15)
```

```
document.write(a);
```

**ans: 15**

14. var a=new Array(23,35,5,new Array(23,42));

```
document.write(a.length);
```

**ans: 5**

15. var a="Bangladesh is our properties";

```
var b=a.substing(14,17);
```

```
document.write(b);
```

**ans: our**

16. var a=new

```
Array("Dhaka","Khulna","comilla");
```

```
document.write(a[0,2]);
```

**ans: comilla**

17. var a=12;

```
var b="16"
```

```
var c=a+b;
```

```
document.write(c);
```

**ans : 1216**

18. var a=10string;

```
var b=20;
```

```
var c=a*b;
```

```
document.write(c);
```

**ans: 200**

19. What method is used to remove an element from the bottom of an array?

a. push()

**b. pop()**

c. reverse()

d. shift()

20.<script type="text/javascript">

```
x=4+"4";
```

```
document.write(x);
```

```
</script>
```

Output-----?

a) 44

b) 8

c) 4

d) Error output

21.Math. round(-20.51)=?

a) 20

b) -21

c) 19

d) None

22) If x=103 & y=9 then x%=y , what is the value of x after executing x%=y?

a) 4

b) 3

c) 2

d) 5

23.<script type="text/javascript"

```
language="javascript">
```

```
qpt=((45%2)==0)? "hello" : "bye";
```

```
document.write(qpt);
```

```
</script>
```

a) hello

b) bye

c) Error in string handling

d) None of the above

24.<script type="text/javascript"  
language="javascript">

```
function sum(x)
{
function add(y)
{
return x+y;
}
return add;
}
function callme() { result=sum(5)(5);
alert(result); }
</script>
```

If you call the function callme(), what will happen ?

- a) 10
- b) Error in calling Function
- c) 5
- d) None of the above

25.----- attempts to evaluate a string representing any javascript literals or variables, converting it to a number.

- a) eval
- b) parseFloat
- c) parseInt
- d) None

26.What property would you use to redirect a visitor to another page?

- a) document.URL
- b) window.location.href
- c) .document.location.href
- d) link.href

27.Which is not a reserved word?

- a) interface

b) short

c) program

d) throws

28.How can you declare variable name in javascript?

1. Ans: The first letter of a variable name must be a letter or an underscore (\_). age, year, \_month are all valid variable names. However, 11month, 9\_ are not valid variable names.
2. A variable name cannot contain any space characters. If your variable consists of more than one word, separate each word with a underscore (i.e., first\_name, last\_name) or make the first letter of each word a capital letter (i.e., FirstName, LastName).

Remember that variable names are case-sensitive. In JavaScript, a variable named *first\_name* is considered different from first\_Name or FIRST\_name.

29.Where global variable are used?

Ans: Outside of function.

30.What is the function of setInterval?

Ans: repeats a script action

31.Switch case

SUBJECT: JAVA SCRIPT(MCQ)

MODULE:

1

1. What is the general format of JavaScript?

- a. <script language="JavaScript">  
</script>
- b. <script language="JavaScript">  
</script>
- c. <script language="JavaScript">  
</script>
- d. <script type="text/Script">  
</script>

2. What is the first thing to checked for debugging your script?
  - a. Input and output
  - b. Body
  - c. Both Tag
  - d. Html
3. How many message/messages can be send by the alert function?
  - a. One
  - b. Two
  - c. Three
  - d. Four
4. Maximum how many arguments can take a prompt function?
  - a. One
  - b. Two
  - c. Three
  - d. Four
5. The built in and user defined functions worked and launched in the same way?
  - a. True
  - b. False
6. Which the following statement is TRUE?
  - a. JavaScript is a compiled language
  - b. JavaScript is an interpreted language
  - c. Both compile and interpreted language
  - d. None
7. What is/are correct answer for comments in JavaScript?
  - a. <- ->
  - b. ''
  - c. /\* \*/
  - d. //
8. Which is/are Hexadecimal literal?
  - a. Oxabcdef
  - b. OxABCDEF
  - c. OxaaBBcc
  - d. Oxbgccff
9. Each property in an array is an.....and each element can be assigned a.....
  - a. Element, value
  - b. Element Address
  - c. Element data
10. Which symbol is used dummy work?
 

**A.** \*   **B.** \$   **C.** %   **D.** #
11. In the following which is/are correct for variable or function?
  - a. first name
  - b. first-name
  - c. firstName
  - d. firstname
- 15.C=a<b; C=C+string; C=C+number; Now c is –
  - a. String
  - b. Number
  - c. Boolean
  - d.Undefined
16. Objects are a collection of...
  - a. Elements
  - b. Functions
  - c. Properties
  - d. Operators
17. Var a =86.45+(20\*7); The data type of a is
  - a. String and primitive
  - b. Number and primitive
  - c. String and compound
  - d. Number and compound
18. var parts =new Array ("bolts" "nuts" "washers" "screws")

var a=parts. length; Output is—

- a. 0
- b. 3
- c. 4
- d. 5

19. From the question 18, Output of parts[3] is—

- a. bolts
- b. nuts
- c. washer
- d. screws

20. In the following functions which are not changes the array?

- a. join()
- b. sort()
- c. slice()
- d.concat()

21.what is regular expression?

22. Write about Undefined and Null values?

23. Write about Global and Logical variable?

24. Describe about Primitive and compound data:?

17. You cannot create objects made of the function.

- a). True
- b). False

18. How can you reference part of a string?

- a). txt.substr(5,6);
- b). text.part(5,6);
- c). txt.piece(5,6);
- d). txt.split(5,6);

19. How do you locate the first position of “method” in a string (txt=“How much you would

Actually use these methods depends on your page design.”)?

- a). txt.find(‘method’);
- b). txt.locate(‘ method’);
- c). txt.indexOf(‘method’);
- d). txt.countTo(‘methoa’);

20. A property of myobj is defined using;

- a). property myobj. x
- b). myobj.x
- c). myobj property.x
- d). var x propertyOf myobj

21. Your company assigns you to work on a JavaScript project. With the DATE object, which of the following allows you to create object?

- a). cerate date()
- b). new Date()
- c). Date object()
- d).Date()

22. How would you change a date to one week later?

- a). myDate.chgDate(7);
- b).myDate.setDate(myDate.getDate()+7);
- c). myDate.setDate(+7)
- d).

myDate.chgDate(myDate.getDate()+7);

23. Seek the truth about setInterval():

- a).The statement(s) it executes run (s) only once.
- b). The statement(s) it executes run(s) over and over again.
- c). clearInterval () won’t stop its execution.
- d). the delay is measured in hundredths of a second.

24. Choose the built-in JavaScript object:

- a).Array
- b).mine Type
- c).Password
- d). Area

25. When authoring web page with JavaScript . why should you explicitly include the window object onto your codes?

a). This is a good practice ensures browser compatibility

c). This is REQUIRED ensures OS compatibility

26. How many arguments in an open() method?

a). Two

b). Three

c). Four

d). Five

27. In the followings which is/are the arguments of the open() method?

a). url

close

c). name

value

e). feature

window

g). replace

script

28. In JavaScript, an element is referenced as an .....and each of the elements attributes is referenced as a.....

a). Frame, Array

b). Object, Property

c). Property, Value

d). Name, Value

29. If you have frames within a page, how could you address the fourth frame?

a). window.frames[4]

b). window.frames[3]

c). window.parent.[3]

d). window.parent.frames[3]

30. All window objects have a frames[] array.

a). True

b). False

31. What is object oriented programming? What type of language JavaScript is?

b). This

d). This

Ans: An OOP language allows you to define your own objects and make your own variable types. JavaScript is an Object Oriented Programming (OOP) language.

32. What do you know about Object? How could you create user define objects?

33. Describe properties and method.

34. What is DOM? Describe briefly.

35. Write the importance of OOP?

36. What will you see if you execute the bellow for

b). (a=100;a>0;a=10){document.write(a);}

a). 1009080706050403020100

d). b). 100908070605040302010

c). 100,90,80,70,60,50,40,30,20,10

f). d). Nothing

37. How may basic structures in javaScript?

h). What are those?

38. Define function and Statement?

39. Why we use switch, case and break?

## Quiz-5

1. What do you mean by OOP?

a) Object Oriented Programming.

b) Object And Object Property

c) Operate Object Program

d) Objects Operates Process

2. What operator serves as a linking device for the different level s to

reference the hierarchy in JavaScript?

a) Arrow(->)

b) Dot(.)

C) Equal(=)

d) Forward slash(/)

3. Which is the correct answer for

referencing the third element in a first form name into?

- a) Document.form 1.element3.value
  - b) Document.form 0.element2.value
  - c) Document.form[0].element[2].value
  - d) Document.info.element[3].value
4. How many arguments are in the open () method?
- a) Two
  - b) Three
  - c) Four
  - d) Five
5. The arguments of the open method is optional-
- a) True
  - b) False
6. How can we define our own objects?
- a) By new array()
  - b) By new object()
  - c) By new window
  - d) All are true
7. What is/are the use of the object properties?
- a) We can assign value
  - b) We can create new properties
  - c) We can create new object
  - d) Nothing to do
8. What are the properties of a text field?
- a) On change
  - b) On blur
  - c) Name
  - d) Value
- Ans ??
9. What is the return of screen.color Depth?
- a) Color correction
  - b) Color variety
  - c) Color quality
  - d) Color code

10. How do you put a message in the browser's status bar?
- a) Window default Status="put your message here"
  - b) Status bar="put your message here"
  - c) Status="put your message here"
  - d) Window.defaultStatus("put your message here")
11. What is the window property that helps us to find where am I?
- a) Window .navigation
  - b) Window.status
  - c) Window.location
  - d) Window.address
12. What is the correct JavaScript syntax for opening a new window called "window5"?
- a) New("<http://www.w3schools.com>".  
window5)
  - b) Window.open("<http://www.w3schools.com>".  
windows5")
  - c) Open.newwindow("<http://www.w3schools.com>".  
windows5")
  - d) New.window("<http://www.w3schools.com>".  
windows5")
13. How do you find the client's browser name?
- a) Self.browser.name
  - b) Self.navigator.appName
  - c) Self-element.navName
  - d) Self.client.browserName
14. Which property would you use to record visited pages?
- Ans: window history
15. Which of the following allows you to call a function based on an elapsed time?
- Ans: setTimeout()

16. How do you find out which character occurs at the 5<sup>th</sup> position in a string "How are you"?  
Ans: charAt()
17. You cannot create objects made up of the function ?  
Ans: True
18. How can you reference part of a string?  
Ans: txt.substr(5,6);
19. What is object oriented programming? What type of language JavaScript is?
20. What do you know about object?
21. How could you create user defined object?
22. Describe properties and object .
23. What is DOM, Describe briefly.
24. Wrote the importance of OOP.
1. JavaScript lines end with what?  
A. Comma  
B. Semicolon  
C. Colon  
D. Bracket
2. The most common way to assign a value to a variable is by using what?  
A. Equals sign  
B. Name It  
C. CSS  
D. HTML
3. It is usually advisable to keep as much JavaScript as possible in which section?  
A. Head  
B. Layer  
C. Body  
D. Title
4. a++ is the same as which of the following?  
A. a=a+2  
B. a=a+3  
C. a=a+1  
D. a=a+4
5. Inside which HTML element do we put the JavaScript?  
A. Scripting  
B. JavaScript  
C. Script  
D.
6. What is the correct JavaScript syntax to write "Hello world"?  
A. "Hello World"  
B. document.write("Hello World")  
C. Response.write("Hello World")  
D. ("Hello World")
7. Where is the correct place to insert a JavaScript?  
A. Head  
B. Body  
C. Title  
D. table
8. Which has no syntax error?  
A. alert("hello "+3+" times")  
B. alert("hello "+3 times)  
C. alert("hello +3+ times")  
D. alert("hello "+3+" times")
9. What is the correct way to write the conditional statement for executing some statement only if x is equal to 12?  
A. If x=2  
B. If (x== 12)  
C. If x=12then  
D. If x== 12 then
10. Which of the following is a correct JavaScript Comment?"  
A. //This is a JavaScript comment  
B. <-- This is a JavaScript comment  
C. ./This is a JavaScript comment  
D. This is a JavaScript comment

11. Consider the following code in JavaScript which tries to calculate and print area of a rectangle.

- A. Var length=20;
- B. Width=10;
- C. Var area=length\*width;
- D. document. Write("Area of rectangle is "+Area);

12. Which of the following is not true about JavaScript?

- A. JavaScript can be embedded within HTML
- B. A file containing JavaScript can be viewed in a local browser with JavaScript enabled
- C. You need a compiler to compile JavaScript
- D. JavaScript is totally different from java

13. How do you write "Hello World" in an alert box?

- A. msgBox ("Hello World")
- B. alert box ("Hello World")
- C. alert box= "Hello World"
- D. alert ("Hello World")  
????

14. How do you create a function?

- A. Function::my function()
- B. Function: my function()
- C. Function my function()
- D. Function my function()

15. Which best describe JavaScript?

- A. A low level programming language.
- B. A Scripting language complied by compiler
- C. A complied Scripting language.
- D. A object oriented Scripting language

16. Which of the following are true?

- A. JavaScript made semicolons optional

B. You can use any combination of upper and lower case characters that you want in a function and variable name

C. JavaScript is interpreted by your browser.

17. JavaScript\_\_\_\_\_ is to gather information from the user.

- A. alert
- B. document
- C. prompt
- D. write

18. How do you call a function named "my function"?

- A. my function()
- B. call function my function
- C. call my function()

19. How to send a message to the page?

- A. Using alert function
- B. Using document function
- C. Using prompt function
- D. Using written function

20. How do you write a conditional statement for executing some statements only if "I" is not equal to 5?

- A. If!= 5 then
- B. If (I !=5)
- C. IF<>5
- D. If(i<>5)

### DESCRIPTIVE

I. Describe the following code

```
<html>
<body>
<script type="text/ JavaScript">
!- -
document. Write ("Vyom
Technosoft!")
//- -.
</ script>
</body>
</html>
```

1. When a user views a page containing a Javascript program, which machine actually executes the script?

**A. The User's machine running a Web Browser**

B. The web Server

C. A central machine deep within Netscape's corporate offices

D. None of the above

2. What are Variables used for in Javascript Programs?

**A. Storing numbers, dates or other values**

B. Varying Randomly

C. Causing high school algebra flashbacks

D. None of the above

3. \_\_\_\_\_ Javascript statements embedded in an HTML page can respond to user events Such as mouse-clicks, form input and page navigation.

**A. Client-side**

B. Server-side

C. Local

D. Native

4. What should appear at the very end of your JavaScript?

The <script

LANGUAGE="Javascript">tag

**A. The </script> B. The <script>**

**C. The END statement**

D. None

of the above

4. Which of the following are capabilities of functions in Javascript?

A. Return a value

Ans. To Ques.no-1

Difference between interpreted language and compiled language are given below:

Interpreted languages are easy to learn, but it takes more time to execute the code or run.

Interpreted

Language is javascript.

Compiled languages take much time to debugging, testing but it executes very easily.

C++, java etc are compiled language.

Compiled languages need a compiler to translate the source code to machine code.

Ans. To Ques.no-2

Parser: Parser is an interpreter which reads the code.

Ans. To Ques.no-3

First of all we write <html> tag, then <body> tag, then write <script type=text/javascript> tag by which

We call the javascript, then use the <!-- --> which is hiding comments, then we use the document.

Write function to print Vyom Technosoft! And // means the single line comments, then we use the clo-

Single tag of script, body and html respectively by </script>, </body> and </html>

B. Accept parameters and Return a value

C. Accept parameters

D. None of the above

5. Which of the following is not a valid javascript variable name

A. 2 names B. first and last names

C. First and last D. None of the above?

6. How does javascript store dates in a date object?

A. The number of milliseconds since January 1st, 1970

B. The number of days since January st.1900  
C.The number of seconds since Netscape's public stock of offering.

D. Nune of the above

7. What is the correct Javascript syntax to write "Hello word"?

A.

System.out.println("Hello word")

B. Println("Hello word")

C. Document.write("Hello word")

D. Response.write("Hello word")

8. Which of the following way can be used to indicate the LANGUAGE attribute?

A.LANGUAGE="javascript version">

B. <SCRIPT LANGUAGE="javascript version">

C. LANG="javascript version"

9.Which of the following event fires when the form element loses the focus:<button>.<input>.<label>.<select>.<texterea>?

A. Onfocus B. Onblur C. Onclick D. Ondblicl

10. Java script is interpreted by

A. Client B. Server C. Object D. None of the above

11. Using-----statement is how you test for a specific condition

A. Select B. If C.Switch D.for

12. Which of the following is not consider a javascript operator?

A. new B. this C. delete D. type of

### Java Script-MCQ

15. Which of the following is the structure of an if statement?

- A. if(conditional expression is true) then execute this code end if
- B. if(conditional expression is true) execute this code end if
- C. if(conditional expression is true){then execute this code}
- D. if(conditional expression is true)then execute this code;

16. How do you read the first character in a string?

- A. stringName.charA1(0)
- B. stringName.substring(1)
- C. stringName.charA1(1)
- D. stringName.charA1(2)

17. Which method will open a new window?

- A. window.launch(pageURL.windowName.settin gs);
- B. window.close(pageURL.windowName,setting s);
- C. window.open(pageURL.windowName.setting s);
- D. popUp(pageURL.windo wName,settings);

18. Which method is used to search for a substring?

- A. stringVariable.substring(substring)
- B. stringVariable.find(substring)
- C. stringvariable.indexOf(substring)
- D. stringVariable.indexOf(charA1(0))

19. Which of the following is a correct for loop

- A. for(i=0; i<=10; i++) B.  
for(j<=10,j++) C. for j=1 to 10 D.  
for(j=0;j<=10)]

20. Consider the following for loop

```
Var x=4;
For (i=0; i<=2; i++)
{
X=x+3
}
```

What is the value of x at the end of for loop

- A.5 B.8 C.13 D.11

21.consider the following code in javascript,which tries to calculate and print area of a rectangle.

```
A.var length=20; B.width=10; C.var
area=length*width;
D.document.write("Area of rectangle
is".Area);
```

22.consider the following while loop

```
Var i=10;
{
I=i+3;
}
```

Document.write(i)

What is the value of I at the end of while statement?

- A.10 B.13 C.16  
D.18

24.which of the following is not a mouse event?

- A.onmousesroller B.onclick  
C.onmouseover D.onmousemove

15. Which of the following is the structure of an if statement?

A. if(conditional expression is true)  
then execute this code end if

B. if(conditional expression is true)  
execute this code end if

C. if(conditional expression is  
true){then execute this code}

D. if(conditional expression is  
true)then execute this code;

16. How do you read the first character in a string?

- A. stringName.charA1(0)  
B. stringName.substring(1)  
C. stringName.charA1(1)  
D. stringName.charA1(2)

17. Which method will open a new window?

A.  
window.launch(pageURL.windowName.settin  
gs);

B.  
window.close(pageURL.windowName,setting  
s):

C.  
window.open(pageURL.windowName.setting  
s);

D.  
popUp(pageURL.windowName,settings);

18. Which method is used to search for a substring?

- A. stringVariable.substring(substring)  
B. stringVariable.find(substring)  
C. stringvariable.indexOf(substring)  
D. stringVariable.indexOf(charA1(0))

19. Which of the following is a correct for loop

- A. for(i=0; i<=10; i++) B.  
for(j<=10,j++) C. for j=1 to 10 D.  
for(j=0;j<=10)]

20. Consider the following for loop

```
Var x=4;
For (i=0; i<=2; i++)
{
X=x+3
}
```

What is the value of x at the end of for loop

A.5            B.8            C.13

D.11

21.consider the following code in javascript,which tries to calculate and print area of a rectangle.

```
A.var length=20; B.width=10; C.var
area=length*width
```

```
D.document.write("Area of rectangle
is".Area);
```

22.consider the following while loop

```
Var i=10;
```

```
{
I=i+3;
}
```

```
Document.write(i)
```

What is the value of I at the end of while statement?

A.10            B.13            C.16            D.18

24.which of the following is not a mouse event?

A.onmousetroller            B.onclick  
C.onmouseover            D.onmousemove

## Written Questions in Java Script

1. What are the characteristics of JavaScript?

Ans:

- a. Most popular scripting language.
- b. Interpreted and lightweight language.
- c. Can read and write HTML element.
- d. Can do validation check.
- e. Can create cookie.
- f. Can react to event.
- g. Can detect user's browser.

2. What is the function of return statement?

Ans:

The function of return statement is to provide the value of the expressions within the function.

3. What do you mean by local and global variable?

Ans: A global variable, as the name implies, has global scope and is defined in the entire script. Local variables are local to the functions in which they are defined.

4. What is the difference between while and do-while loop?

Ans:

The while loop begins with a termination condition and keeps looping

Until the termination condition is met.

Do while loop always executes statements in the loop in the first iteration

Of the loop.

5. What is the function of break and continue statement?

Ans:

Continue and break statement is used in loop in javascript.

The **break statement** will break the loop and continue executing the code that follows after the loop (if any). Continue statement Can jump out of the sequence of the loop structure.

6. What is JavaScript Event?

Ans: Events are actions that take place in a document, usually as the result of user activity. Common examples of user actions that trigger events include clicking a button or typing a character into a text field.

7. What do you mean by Array? How will you declare an array?

Ans: An array is a collection of homogenous data elements which are stored in consecutive memory locations. An array can be declared in JavaScript in the following ways...

```
Var myArray=new Array();
```

```
Var myArray=new Array("Value 1", "Value 2", "Value 3", "Value 4", "Value 5");
```

```
Var myArray=new Array(dimension argument);
```

8. What is the difference between "==" and "===" operator?

Ans:

"==" and "===" both are comparison operator.

"==" compare with only value of variable and "===" compare not only value but also type of variable.

9. What do you mean by “with” statements? Write it’s syntax.

Ans:

The With Statement is a shortcut. Instead of having to list all of the properties of an object by repeating the basic object, we can state the bulk of the object in a with statement and then the properties within the context of the with statement.

10. What do you mean by DOM? Write its properties.

Ans:

The Document Object Model (DOM) is a cross-platform and language-independent convention for representing and interacting with objects in HTML, XHTML and XML documents.

11. What is history object? Write methods of it.

Ans:

The history object is a property of the window object. It has a single crossbrowser property, length, and three cross-browser methods, back(), forward(), and go(n). The length refers to the number of previous urls that have been saved.

12. What do you mean by cookies?

Ans:

Think of cookies as little lumps of data stored on the viewer’s hard drive. Cookies are stored as data files in ASCII format. Cookies provide a convenient

and useful way of passing information about the user through the browser.

13. What is reserved word? Write five reserved word.

Ans:

Reserved words are those in Javascript that have been reserved for statements and built in functions. If we use reserved word for a variable or function name, Javascript might execute the statement or function for the reserved word and not our variable or function. Example--

a)abstract b)boolean c)class  
d)do e)else

14. Write about ‘interpreted’ and ‘loosely typed language’ according to JavaScript?

Ans:

JavaScript is an interpreted language because it executes without preliminary compilation.

javascript is weakly type language. Javascript is called weakly type language. Because it implicitly converts or casts types when used.

15. What do you mean by events and events handler?

Ans:

Events are actions that take place in a document, usually as the result of user activity.

Event handlers are the interactive triggers in HTML and Javascript .Whether

the script traces a location or history property or launches a function.

16. What is the difference between setInterval() and setTimeout()

Ans:

`setInterval()`:

The `setInterval()` method repeats a script action every so many milliseconds, initiating the script after the specified number of milliseconds.

`setTimeout()`:

the `setTimeout()` method works the same as `setInterval()`, except that it does not repeat the script.

17. What is the difference between `substring()` and `substr()`?

Ans:

`substring()` :

The `substring()` method extracts the characters from a string, between two specified indices, and returns the new sub string.

`substr()`:

The `substr()` method extracts the characters from a string, beginning at "start" and through the specified number of character, and returns the new sub string.

18. What is the function of `charAt()`?

Ans:

`charAt` is used to find out what character is first, second, third, and so on. The important thing to remember is that when dealing with the position of a character, the count starts at zero, not one. So the first character is actually at position zero.

19. What is the function of `indexOf()`?

Ans:

`indexOf` is used to check for a character or even a small string within the current string, and returns the position at which your character or string begins.

20. . What is function? How can you define function in JavaScript?

Ans:

A function will be executed by an event or by a call to the function. A function contains code that will be executed by an event or by a call to the function.

Function is defined as follows:

Function

`function_name(argument/parameter)`

{

Function body

}

21. What are the difference between `alert()` and `prompt()`?

Ans:

**Alert:** The `alert()` method displays an alert box with a specified message and an OK button.

**Prompt:** The `prompt()` method displays a dialog box that prompts the visitor for input.

This method returns the string the visitor has entered.

22. What is the function of `typeof` operator in JavaScript?

Ans:

The "typeof" operator in JavaScript allows us to probe the data type of its operand, such as whether a variable is

string, numeric, or even undefined.

23. What do you mean by object? Write 5 built in objects in JavaScript?

Ans:

Objects are collection of properties arranged in a hierarchy. JavaScript supports working with objects. Objects are used for working with specific data and have different functions which help the user in programming tasks.

**Built in Objects:** The built-in objects in JavaScript are Date, Math, String, Array, and Object. Each is used in a unique and not-quite-consistent way.

24. What is the function of floor(), ceil() and round() methods of Math object?

Ans floor( ):The floor() method rounds a number DOWNWARDS to the nearest integer, and returns the result.

Syntax: Math.floor(x); x is a Required number

The ceil() method rounds a number UPWARDS to the nearest integer, and returns the result.

Syntax: Math.ceil(x); x is a Required number

25. How to use ternary operator in JavaScript?

Ans:

Ternary operators are permissible when the entire ternary operation fits on one line. Longer ternaries should be split into if else statements. Ternary operators should not

ever be nested. Optionally parentheses can be used around the condition check of the ternary for clarity.

26. What is escape sequence? How to use this?

Ans:

***Character combinations consisting of a backslash (\) followed by a letter or by a combination of digits are called "escape sequences"***

***we can use escape sequences to put such characters as tab, carriage return, and backspace into an output stream.***

27. What is Regular Expression?

Ans: given before

28. What are JavaScript Data Types?

Ans:

***In JavaScript, there are three primary data types, two composite data types, and two special data types.***

***The primary (primitive) data types are:***

- ***String***
- ***Number***
- ***Boolean***

***The composite (reference) data types are:***

- ***Object***
- ***Array***

***The special data types are:***

- ***Null***
- ***Undefined***

29. What is the difference between undefined value and null value?

Ans:

An undefined value is returned when you attempt to use a variable that has not been defined or one that is declared but that you forgot to provide with a value a nonexistent property of an object also returns undefined if it is addressed.

On the other hand, null amounts to a “nothing literal.” You can declare and define a variable as null if you want absolutely nothing in it but you don’t want it to be undefined. Null is not the same as zero (0) in JavaScript.

30. What is eval() in JavaScript?

Ans:

Eval( ): The eval() function evaluates and/or executes a string of JavaScript code. First, eval() determines if the argument is a valid string, then eval() parses the string looking for JavaScript code. If it finds any JavaScript code, it will be executed.

Syntax: eval (string); string is Optional.  
The string to be evaluated /executed.

0

Ans:

Given before

31. What do you mean by DOM? Write its properties.

Ans:

The Document Object Model (DOM) is a cross-platform and language-independent convention for representing and interacting with objects in HTML, XHTML and XML documents.

31. Define escape sequence.

Ans:

***Character combinations consisting of a backslash (\) followed by a letter or by a combination of digits are called "escape sequences"***

***we can use escape sequences to put such characters as tab, carriage return, and backspace into an output stream.***

32. Define concatenation
